MODULAR BUILDINGS

TECHNO METAL POST

THE IDEAL FOUNDATION FOR YOUR MODULAR BUILDINGS

Increasing in popularity is the famous “Modular Home”. Built indoors in a controlled factory environment, then transported (generally in two or more sections) to its final location, to be assembled on-site with TMP’s helical piles.

The foundation is installed effortlessly and guarantees a solid, stable and durable structure for years, even on difficult terrain. The piles are installed in a few days, sometimes in less than a day, so you can start assembling your modular building immediately.

Sometimes excavation can be limited or nearly impossible, but installing with helical piles can create an above ground crawl space for other projects.

Non-polluting, rapid installation, with a minimal carbon footprint, Techno Metal Post’s helical piles are also easily dismantlable.

WHY CHOOSE TECHNO METAL POST ?

SIMPLE AND QUICK

NO EXCAVATION

LOW FOOTPRINT

ENGINEERING SERVICE

STANDARDS COMPLIANCE

TECHNO METAL POST'S HELICAL PILES ARE CERTIFIED AND GUARANTEED
